

FedEx Freight Drops Scorecard

*Another Example of How Teamsters
Are Already Working For Us*

First, FedEx Freight announced an 80-cent-per hour raise effective in October, just days after Local 107 filed for its Teamsters election.

Now we hear the company will eliminate the Driver Scorecard. This is yet another way the Teamsters are already working for us.

We all know the scorecard was unfair and could lead to terminations and harsh punishment. This is the reason why we are forming our union, so that we can have a say in issues like the Scorecard and fair wages.

The company will continue to make changes in our workplace in an effort to thwart our campaign, but we cannot let management dissuade us.

We know that unless we have our wages, benefits and working conditions negotiated in a legally binding union contract, anything the company gives us can be taken away at any time.

As Teamsters we will have a real say in improving our wages, benefit and working conditions.

Let's remain united and focused!
