

DON'T LET POLITICIANS PULL A **FAST ONE** ON AMERICAN WORKERS

Tell Congress to oppose "Fast Track" legislation that locks us into job killing trade deals

"Fast Track" legislation derails the job Congress is supposed to do: making sure every provision of every treaty is in the interest of American workers and their families, not a partnership between big corporations and big profits.

"Fast Track" legislation will soon be voted on in Congress. The legislation would prevent members of Congress from amending a single provision of trade deals – provisions that are often crafted in secret with the help of corporate lobbyists and will end up costing US jobs.
