

## **JOBS**

Good jobs build a strong nation. Good jobs pay a living wage, They provide health care and retirement security and are safe for workers and the public. Good jobs are jobs that are not traded away in unfair trade deals.

The Teamsters Build Back Stronger campaign is committed to Building Back Good Jobs. Our campaign includes:

## **SAFE WORKPLACES**

Workers should not be afraid to go to work. Employers should enable social distancing, provide paid leave, and high quality personal protective equipment. The Federal government must enforce health and safety standards when employers put profits over safety. Hours of service requirements must allow for necessary rest, and we must invest in highway infrastructure to protect drivers and everyone on our country's roads.

## **QUALITY WAGES AND BENEFITS**

Workers should make a wage that allows them to support themselves and their families. Davis-Bacon prevailing wage protections must be comprehensively applied. Employer provided health care, paid leave and retirement security are also key elements of a good job.

## FAIR TRADE

Workers should not fear their jobs will be sent overseas or that their wages will be driven down by foreign competition or weak, exploitative labor standards.
